

# Cryptocurrencies and Blockchains

This webinar was created by the *Financial Stability* working group, and is part of the *Digital Economy* series.

For the second session of our webinar series on Digital Currencies, we will have the pleasure to receive an specialist on **Cryptocurrencies and Blockchains**: professor Alexander Lipton (Connection Science Fellow, Massachusetts Institute of Technology and Visiting Professor of Financial Engineering, École Polytechnique Fédérale de Lausanne). He will focus on important aspects related to these topics, such as financial innovation and financial stability risks. The webinar will happen **Thursday July 19th, 13:30 EST, 19:30 CET**

You can know more on the work of professor Alexander Lipton on the following links:
